

C-120 SUPERGRANO

Forage Harvesters

At JF, we take your forage seriously! What about you?

Discover why **JF C120 SUPERGRANO** is the most suitable machine for converting your dry maize into high-quality food for your animals.

FEATURES

- ✓ Perfect for taking advantage of corn and other dry forage that could not be harvested in time or for grains, converting them into animal feed;
- ✓ 24 chop sizes available with easy shifting, allowing the **JF SUPERGRANO** to be converted into a JF C120 Forage Harvester through an optional kit;
- ✓ Foldable feeding box with 4 drums and compression spring: chopping precision and better pre-processing of dry forage;
- ✓ Heavy-duty transmission and reliable design from the world's leading brand of forage harvesters, proven in more than 55 countries;
- ✓ Polyethylene fairing for better feeding flow and minimizing losses. Besides, it makes the machine safer;
- ✓ Integrated sharpener for faster daily maintenance;
- ✓ Mill with 36 high resistance hammers to grind the previously chopped product;
- ✓ Efficient discharge through a fan and discharge pipe directly into the forage wagon.

With JF, take complete control over the time and manner in which your forage is harvested!

Equipped with powerful hammer mil

4 drums: more chop precision

Blades, counter blades and hammers: Special heat treatment

TECHINICAL SPECS

⚙️ Screen sizes	3 units (14, 16 y 18mm)	🔪 Chop sizes	24 (from 2 up to 36mm)
⚙️ Number of rotors	1	🔪 Number of blades	12
⚡ Required power at PTO	from 55 up to 90 hp	📦 Approximate weight	820kg
🔄 Required rotation at PTO	540 RPM	🔗 Linkage type	cat II
🔌 Drive	Tractor PTO	🚗 Transmission System	gearbox and cardan

For the proper functioning of the equipment, we recommend that the harvested material (corn or sorghum) have a humidity between 12 and 14%.
