

# INOCULANT SPRAYER

EXCLUSIVE KITS

Discover below why the JF Inoculant Sprayer Kit is the ideal solution for preserving the quality of your forage.

## BENEFITS

- ✓ Direct and efficient spraying that accelerates fermentation and preserves the nutritional quality of the silage;
- ✓ Resistant polyethylene tank designed for mixing water and inoculants in the proportions recommended by the manufacturer, ensuring uniform application;
- ✓ Diaphragm pump and regulator valve with an integrated pressure gauge for precise pressure adjustment during spraying;
- ✓ Ceramic spraying nozzle that ensures efficient distribution of the inoculant onto the forage discharged by the machine;
- ✓ Easy installation and operation: Includes a metal base with supports for mounting on forage harvesters and an electric system with an ON/OFF switch located in the tractor's cabin.

At JF, we take your forage seriously! What about you?

## TECHINICAL SPECS

Capacity	50 liters	Capacity	100 liters
Max pression in the pump	100 PSI (6.9 BAR)	Max pression in the pump	100 PSI (6.9 BAR)
Max pump flow rate	5L/MIN ( 1.3 GPM)	Max pump flow rate	5L/MIN ( 1.3 GPM)
Electric power supply	12 VOLTS	Electric power supply	12 VOLTS
Approximate weight	41.7 KG	Approximate weight	55 KG
