

MIXERS 3.5 / 5.5

Vertical feed mixer

At JF, we take your forage seriously! What about you?

Find out why JF Vertical Feed Mixers are the ideal solution for precise and concentrated feed. With a homogeneous and high-quality feed, every animal from the first to the last one along the trough will benefit.

FEATURES

- ✓ MOVmix® Technology that assures an efficient mix with low coefficient of variation in the entire mixing tank, even close to the walls;
- ✓ Silage self-loading system for saving labor, preserving the silage wall and speeding up silage feed out. Also available on version without self-loading system;
- ✓ Tank made with complete stainless-steel sheet for longer durability and independent from chassis for easier maintenance;
- ✓ Planetary transmission of high resistance and durability;
- ✓ Italian technology weighing & control system with 3 high precision sensors;
- ✓ Blades and counter blades with several adjustments for various mixing conditions.

Self-loading system: Long reach!

Feed opening: Addition of balanced feed!

Complete tank: Stainless steel!

DATOS TÉCNICOS

	3500 VDS	5500 VDS
Drive	tractor-mounted	tractor-mounted
Capacity	3,5m ³	5,5m ³
