

# MIXER 7000 V

Vertical Mixers

## The main ingredient for successful livestock feeding!

The vertical TMR mixer JF Mix 7000 V was designed to overcome one of the main challenges of the livestock farmer: quality feed for better performance and feed cost reduction. Combining the JF quality and technology, the MOVmix mixing system delivers a balanced total mixed ration from the first to the last animal.

## ADVANTAGES

- ✓ MOVmix® technology ensures efficient mixing with a low coefficient of variation throughout the entire tank, even near the walls;
- ✓ Curved and smooth side walls that guarantee a continuous flow of the ingredients;
- ✓ Stainless steel tank for longer durability, with independent chassis that facilitates maintenance;
- ✓ Heavy duty planetary gearbox;
- ✓ Italian weighing system technology with 3 high precision sensors with system for including a personalized recipe;
- ✓ Adjustable knives and counter knives for a better setup depending on the ingredients to be used.

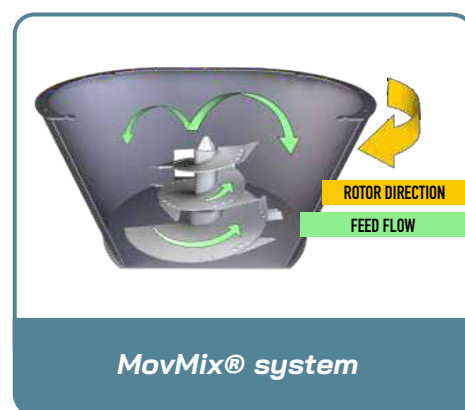

Rotor with exclusive design

Opening for adding concentrate feed
