

JF MIX VDS DUO 7000 11000

Self-Loading Mixers

The main ingredient for a successful farming recipe!

JF's DUO Vertical Mixers bring to the market the most significant innovation in recent years: A mixer featuring a double auger system that ensures a homogeneous mix with much more speed and efficiency to feed every animal from the first to the last with the same feeding quality.

STAINLESS STEEL

Innovative system with 2 augers - faster and more homogeneous mixing.

Features

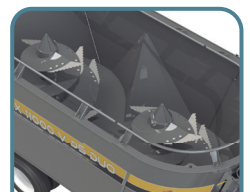

- ✓ DUO MOVmix® technology ensures efficient mixing with a low coefficient of variation throughout the entire tank, even near the walls;
- ✓ Self-loading silage system for labor savings, preservation of silo walls, and quick loading. Also available in versions without self-loading system;
- ✓ High-strength and durable planetary transmission with 2 mixing speeds;
- ✓ Blades and counter blades with multiple adjustment positions for better mix adaptation.

Discharge for both sides through conveyor.

Self-loading system with high loading speed.

Stainless steel mixing tank.

TECHNICAL SPECIFICATIONS

	7000	11000
Drive	tractor-mounted	tractor-mounted
Capacity	7m ³	11m ³
Working height of silage loader	4138mm	4732mm
Required rotation at PTO	540 RPM	540 RPM
Required power at TO	from 75hp	from 85hp
Tires	400/60 R15.5 (T404) HIGH FLOTATION	215/75 R17.5 (4 canvas)
Approximate Weight	3411kg	4194kg
Discharge configuration	discharge by belt, both sides (hydraulic)	discharge by belt, both sides (hydraulic)
